

2.4m 2-Level Workbench with Toolboard

DESCRIPTIONS – FEATURES & BENEFITS

- 2.4m x 600mm work surface: room for long lengths of timber, more pots than you can shake a stick at, or room enough to spread out every part of the old lawnmower.
- Two full-length levels: the main bench plus a lower shelf for bins, off-cuts, power tools and stock, keeping the floor clear
- 2.310m Tool Board: hang, pin and organise tools within arm's reach instead of digging through drawers
- Solid timber frame (90x45mm): built to carry real work, not just hold a few pot plants
- Fits inside most Duratuf Lifestyle sheds or stands alone in the garage, workshop or under a lean-to
- Stain or paint it to match your shed, or leave it raw for a rugged, ready-to-work look

PRODUCT BLURB

Whether it's an old lawnmower needing a carby clean, seed trays that need potting up, or the kids' bikes that need a tyre pumped, this bench gives you a dedicated spot to do it properly. Pair it with a Duratuf Lifestyle shed or cabin and you've got a complete, weatherproof workshop in a weekend.

A serious 2.4 metre workbench & Tool Board built for the way workshops & ‘man-caves/she-sheds’ actually get used - fixing, building, potting, tinkering, and everything in between. Wide enough for full sheets and long timber, deep enough to really spread out, and backed by a 2.3m long tool board that keeps every tool in sight and off the bench.

Slot it straight into your Duratuf Lifestyle shed for an instant workshop, or run it as a standalone bench in the garage, garden or workshop.
